MSI290Ca11
Medium for Primary Canine Olfactory Bulb Neuron Cells (OBNC)
Instruction manual

FOR RESEARCH USE ONLY
NOT FOR USE IN CLINICAL DIAGNOSTIC PROCEDURES

1st Edition (Revised in Oct, 2024)

[Description]

Medium for Primary Canine Olfactory Bulb Neuron Cells, is a liquid medium free of mycoplasma, bacteria and fungi and contains essential and non-essential amino acids, vitamins, organic and inorganic compounds, hormones, growth factors, trace minerals. It is a complete medium designed for optimal growth of Primary Canine Olfactory Bulb Neuron Cells *in vitro*.

[Components]

500 ml of Medium for Primary Canine Olfactory Bulb Neuron Cells consists of basal medium, 10 ml of Neuron Cell growth supplement and 5 ml of penicillin/streptomycin solution.

Note: Neuron Cell growth supplement and P/S solution are not pre-mixed in Primary Canine Olfactory Bulb Neuron Cells Medium; they must be added separately to make the complete Primary Canine Olfactory Bulb Neuron Cells Medium.

[Storage]

Store the basal medium at 4℃, Neuron Cell growth supplement and P/S solutions at -20℃.

Protect from light.

[Shipping]

Basal medium : room temperature. Neuron Cell growth supplement and P/S solutions: dry ice.

[Usage]

Neuron Cell growth supplement and P/S solutions were thawed at room temperature, sprayed with 75% ethanol on bottles and tubes, and transferred to a sterile operating table. In a sterile field,Neuron Cell growth supplement and P/S solutions were added to the basal medium and mixed evenly to obtain the recombinant complete medium, which was directly used for culture of Primary Canine Olfactory Bulb Neuron Cells *in vitro* .

Note: When stored in the dark at 4℃, the reconstituted complete medium is stable for three months.

[Important note]

➢ In order to maintain the best use effect of this product, do not place it in room temperature or high temperature environment for a long time.

➢ This product is for scientific research use only. It is not for diagnostic, therapeutic, clinical, family and other purposes.
